EXPERIENCE

SDE Intern - Android

SRAJAN

📅 Mar 2025 – Sept 2025

📍 Remote

- Enhanced core features of an **Ed-Tech Android application** using Kotlin and Jetpack Compose, improving delivery speed by **30%**.
- Integrated **REST APIs** and optimized data handling, reducing data retrieval latency by **25%** and improving app responsiveness.
- Worked on **API-to-UI integration**, ensuring seamless communication between backend and frontend systems.
- Collaborated with **design and backend teams** across the SDLC for efficient development and smooth deployments.

ACHIEVEMENTS

- Solved **100+ DSA problems** across platforms like LeetCode, GFG, and HackerRank.
- Led **Android development** in a college-level tech exhibition, delivering a functional project.
- Awarded recognition for outstanding academic performance and significant technical contributions in the Computer Science branch.

TECHNICAL SKILLS

Programming Languages

- Kotlin
- Java
- SQL
- Python (Basics)

Android Development

- Jetpack Compose, MVVM, Hilt
- Retrofit, Navigation, Firebase
- Kotlin Multiplatform (KMP)

Backend & Systems

- REST APIs, WebRTC, UDP Sockets, FFmpeg

Core Concepts

- DSA, OOP, Operating Systems, DBMS

Tools

- Git, GitHub, Android Studio, VS Code
- SQLite, Firebase Realtime Database

COURSEWORK SUBJECTS

- Operating System
- Computer Networks
- Object Oriented Programming
- Database Management System

EDUCATION

B.Tech. in Computer Science - 8.49 CGPA

GITA Autonomous College

📅 2022 – 2026

📍 B.S. City, India

Class XII - 69.5%

M.G.M.H. Secondary School

📅 2021 – 2022

📍 B.S. City, India

Class X - 72.5%

M.G.M.H. Secondary School

📅 2019 – 2020

📍 B.S. City, India

PROJECTS

PROXIM – VR PC Gaming via Android Head Tracking

- Kotlin | Python | WebRTC | FFmpeg | UDP Sockets
- Built an Android-based VR gaming system using **gyroscope-based head tracking** and **low-latency UDP communication**.
- Designed a **client-server architecture** with Android (Kotlin) and Python backend using virtual gamepad emulation.
- Implemented **real-time video streaming** using FFmpeg (NVENC) and WebRTC over RTSP.
- Achieved **35–42 ms latency** and stable **60 FPS streaming** across multiple PC games.

InterPrep – AI Interview Preparation System

- Kotlin | Jetpack Compose | MVVM | Gemini API | Perplexity API
- Built an AI-powered interview app with **real-time voice interaction** using STT TTS.
- Integrated **AI APIs** to generate dynamic interview questions based on roles and skills.
- Designed structured interview flows improving **session completion rate by 20%**.

BookVerse – E-Book Reader Application

- Kotlin | Jetpack Compose | Firebase Realtime Database
- Developed a lightweight **e-book reader** with dynamic content loading.
- Integrated **PDF viewing** with optimized rendering for smoother performance.
- Designed **modular architecture** reducing future feature integration effort.
